DEPLOYMENT STATE

PROD LIVE • 100% HEALTH

1. EXECUTIVE OVERVIEW & BUSINESS OBJECTIVES

The **Motilal Oswal Partner Web Portal** is a specialized, high-conversion web property architected by **Precision Pros** to drive verified Demat account openings, investor education, and client lead acquisition under Motilal Oswal Financial Services. Built on a lean single-page architecture, it eliminates navigational friction, provides sub-second page loads, and maintains regulatory, tracking, and referral parameter integrity.

Targeted Lead Acquisition

Prominent Demat onboarding form with real-time Indian phone validation and instant partner attribution.

Zero-Friction Investor UX

Interactive hover-driven asset cards (Equity, F&O, MF, IPOs) preventing broken 404 links and dead ends.

Direct Multi-Channel Reach

One-tap WhatsApp direct chat and telephone dialer (+91 9498003440) for immediate investor advisory assistance.

2. CENTRALIZED LINK HUB & PLATFORM ACCESS GUIDE

GitHub Source Code Repository

GIT REPO

<https://github.com/brahadeeswaran1234-hue/motilal-oswal>

Contains production code, 27 modular stylesheets, assets, and automated CI/CD webhooks connected directly to Vercel production branch (main).

Vercel Deployment Dashboard

LOGIN WITH GOOGLE

<https://vercel.com/dashboard>

Access Instruction: Click "Continue with Google" and log in with your authorized Google account to inspect deployments, edge DNS, and performance metrics.

Google Analytics 4 (GA4)

LOGIN WITH GOOGLE

<https://analytics.google.com/> • ID: G-T4DXB88B0F

Access Instruction: Click "Sign In" using your Google account associated with property G-T4DXB88B0F to review real-time visitors, traffic channels, and conversions.

Live Production Website

LIVE CDN

<https://motilaloswalpartner.com/>

Production custom domain deployed on global edge CDN with automated SSL/TLS certificates and hardened HTTP security response headers.

Official Motilal Oswal Partner Referral Link: <https://mos1.co/MOSWEB/Od8RzT6Rh1>

Embedded across all Demat CTAs

3. TECHNOLOGY STACK & ARCHITECTURAL DECISIONS

TECHNOLOGY	COMPONENT SCOPE	STRATEGIC RATIONALE & PERFORMANCE BENEFIT
Semantic HTML5	Single Page Application (index.html)	Delivers near-instant initial render. Semantic nodes (<header>, <main>, <section>, <footer>) maximize organic SEO search engine crawl efficiency.
Vanilla CSS3 (Modular)	27 Modular Stylesheets (assets/css/)	Zero CSS-in-JS compilation overhead. Eliminates heavy Tailwind / Bootstrap bundle weight while allowing granular caching of specific component styles.
Vanilla JavaScript (ES6+)	Core Client Logic (assets/js/main.js ~26KB)	Zero multi-megabyte React/Vue runtime hydration penalty. Ensures ultra-fast Time To Interactive (TTI) on mobile devices, handling form checks, modals, and event tracking natively.
Vercel Edge Platform	Global Edge Network & CI/CD Hosting	Automated deployments directly linked to GitHub main branch. Provides enterprise-grade Edge caching, automated HTTPS, and microsecond CDN routing.
Google Analytics 4	Measurement ID: G-T4DXB88B0F	Dynamic non-render-blocking injection. Tracks acquisition funnels and fires custom partner_click events on every CTA interaction.
PWA Manifest	Installable Web App (manifest.json)	Enables "Add to Home Screen" on Android and iOS devices, providing native-like app launch without app store friction or distribution overhead.
JSON-LD Structured Data	Schema.org Microdata in <head>	Implements WebSite, Organization, and FAQPage schemas to secure Google rich snippet features and enhanced SERP authority.

4. SECURITY HARDENING & PERFORMANCE BENCHMARKS

Hardened HTTP Headers (via vercel.json)

- X-Content-Type-Options: nosniff (MIME protection)
- X-Frame-Options: SAMEORIGIN (Clickjacking defense)
- Strict-Transport-Security: max-age=63072000; preload
- Referrer-Policy: strict-origin-when-cross-origin
- Permissions-Policy: geolocation=(), camera=()

Performance & Core Web Vitals

- Cumulative Layout Shift (CLS = 0):** Explicit image width/height applied across all visual assets.
- Asset Caching:** 1-Year immutable caching (max-age=31536000).
- Preconnected Fonts:** Google Fonts loaded via non-blocking links.
- Deferred Script Loading:** Main JS executes asynchronously.
